# COMFORT

FOR WHAT MATTERS MOST

The Rheem *Classic*® Series Heat Pump offers the solid technology and energy-saving performance you've come to expect from Rheem. It's also quiet, so you won't give your home comfort a second thought.

## RP15 *Classic*® Series

Cooling Efficiency: 14 to 15 SEER / up to 12.5 EER  
Heating Efficiency: up to 8.5 HSPF

### Quiet and Efficient

Our new heat pumps are designed to perform both efficiently and quietly, delivering home comfort you can count on when you need it most.

### Exceptional Quality and Reliability

Our *Classic*® Series includes features that help fight corrosion, reduce leaks and enhance the overall strength of your heat pump so you can be confident in the way it performs.

INTEGRATED HOME COMFORT

Rheem.com

# We Thought of Everything... And Then Some

The Rheem *Classic*® Series Heat Pumps were developed using our 360°+1 design philosophy, which means every detail of the product is meticulously evaluated from every angle. We consider the work that goes into installing and servicing our products, as well as how we can deliver the very best homeowner experience. And then we take it a step further. That's 360°+1. And that's why you can count on your Rheem Heat Pump to bring you and your family years of comfort.

## Count on Staying Comfortable in Every Season

A smart, efficient design makes the Rheem *Classic*® Series Heat Pump one of your best options for staying comfortable inside. Each new unit includes a generous list of features that work together to bring you quiet, efficient and reliable indoor comfort.

**Reliable and legendary** ① **scroll compressor** technology makes the *Classic*® Series as efficient as it is durable. The ② **optimized fan orifice** also contributes to quieter operation, optimal airflow and better overall performance. Simply put, you get efficient comfort that lasts a very long time. And built-in defrost capabilities mean less time defrosting and more time warming your home.

**A quieter and more durable unit** starts with our smart new ③ **composite base pan**. The design helps eliminate corrosion and adds to quieter performance. Extensive UV testing was done to ensure the base pan stays looking new for years to come. Our enhanced mufflers and improved refrigerant tubing design also contribute to a quieter, more reliable operation. For added strength, ④ **curved louver panels** and ⑤ **rugged corner posts** on the exterior do an excellent job protecting the inside. And optimized reversing valve sizing helps increase the life of your system.

**Curb appeal** is not lost on our new *Classic*® Series. Our heat pumps look as good as they operate. Modern cabinet aesthetics allow your unit to put its best face forward, and a powder coat paint system provides a lasting, professional finish.

**Fast and accurate installation and maintenance** means your savings start with the installation of your new unit. Our *Classic*® Series Heat Pumps are built to go in fast and easy. The control box is also easy to access, and a roomy diagnostic service window means maintenance calls go quickly, saving you time and money.

### Benefits At-A-Glance

\*For complete details of the limited and conditional warranties, including applicable terms and conditions, contact your local Contractor or go to [Rheem.com](http://Rheem.com) for a copy of the product warranty certificate. Conditional warranties must be registered through [registermyunit.com](http://registermyunit.com).

\*\*Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your contractor for details or visit [www.energystar.gov](http://www.energystar.gov).
